REG R16 – REFUELLING

Drivers **going in** or **coming out** of pits for refuelling must follow the **pit lane lines**. Any driver taking advantage of this will be penalized.

- In case a driver does not follow pit lane lines when entering or leaving pits and takes speed/time advantage of such situation, the driver will be penalized by a level 3 penalty (drive through penalty).
- Pit lane lines must be followed both when coming in the pits (Fig A) and even when going out of pits (Fig B).
- If a pit lane line is accidentally crossed over without any serious repercussions i.e. no time is gained over competitors, race director **may** close an eye on that incident.

It is highly recommended that when entering the pits, drivers kill speed and are very cautious in following the pit lane lines to avoid being penalized.
